REVIEW OF OPERATIONS

Carawine is a dedicated exploration company focussed on creating value for its shareholders through the exploration, discovery, and development of mineral deposits. Based in Perth, Western Australia the Group is led by an experienced and successful team with a proven track record of discovery, value creation and corporate transactions.

Carawine has five gold, copper and base metal exploration projects, targeting high value deposits in highly prospective, active mineral provinces in Western Australia and Victoria (Figure 1). Part of Carawine's assets located in Western Australia are held by its wholly owned subsidiary, Phantom Resources Pty Ltd.

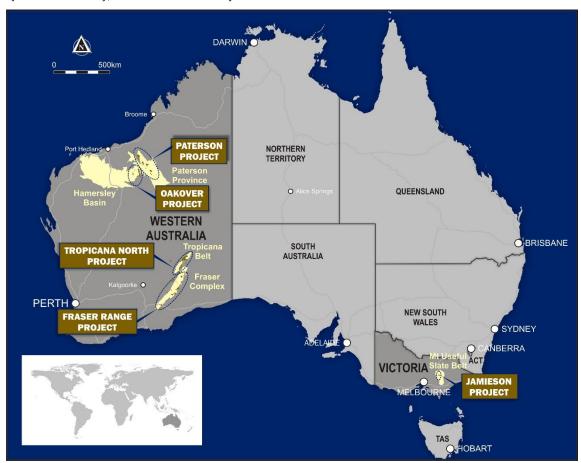

Figure 1: Location of Carawine's Projects throughout Australia.

In the 6 months to 31 December 2021 the Company's exploration activities have centred on its Tropicana North Project, with follow-up drilling extending high-grade gold mineralisation at the Hercules prospect. The Company's farm-in and joint venture agreement partners were also active, with a number of geophysical and drilling programs completed and the announcement of a Mineral Resource estimate.

At the Tropicana North Project, located in the north-eastern goldfields of Western Australia, drilling activities focussed on the Neale tenement – part of the Thunderstruck Joint Venture between Carawine (90% interest) and Thunderstruck Investments Pty Ltd (10% interest) ("Thunderstruck JV"). These activities included follow-up reverse circulation ("RC") and diamond drilling at the Hercules prospect, and an initial phase of RC drilling at the Big Freeze and Beanie prospects.

At Hercules, drilling continued throughout the period and is still ongoing, with results to date extending gold mineralisation along a 340m strike length, from 35m to 250m below surface, and remaining open, confirming Hercules as a significant discovery. Assay results released from Hercules during and subsequent to the period include^{1,2}:

- 4.61m @ 14.7g/t Au from 165.24m (TNDD001), including 0.5m @ 104g/t Au from 166.7m and 0.9m @ 14.2g/t Au from 168.95m
- 0.95m @ 73.7g/t Au from 60.08m (TNDD002), and 0.65m @ 50.6g/t Au from 92.4m
- 6m @ 4.29g/t Au from 117m (TNRC033), including 2m @ 12.4g/t Au from 117m
- 6m @ 3.01g/t Au from 251m (TNDD009), including 5m @ 3.46g/t Au from 252m
- 4m @ 40.1g/t Au from 239m, (TNDD014) including 1m @ 137g/t Au from 239m
- 1m @ 23.9g/t Au from 192m (TNDD013)

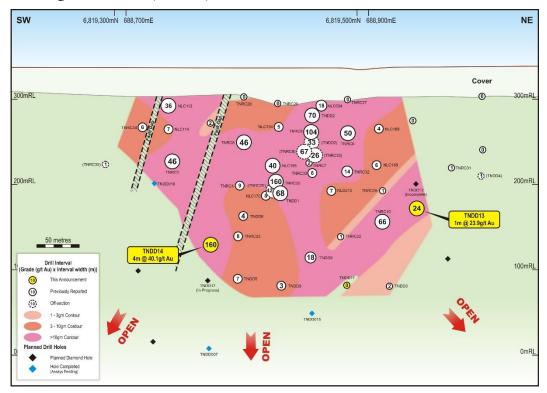

Figure 2: Hercules prospect long section showing significant drill hole gold interval pierce points and contours3.

At the Big Freeze prospect, an initial program of RC drilling designed to test a historic gold anomaly was successful in defining a 900m-long, continuous zone of gold mineralisation above 1g/t Au in wide-spaced drilling⁴. Follow-up RC drilling designed to test this zone for higher-grade, continuous gold mineralisation was completed subsequent to the reporting period, as was follow-up RC drilling at the newly discovered Beanie prospect. Assay results from Big Freeze and Beanie are expected before the end of April 2022.

Also at the Tropicana North Project, the Company has identified and generated numerous prospects, targets and target areas within the Thunderstruck JV tenements and tenements in which Carawine has a 100% interest. These add to a growing pipeline of quality targets at Tropicana North, ranging from conceptual and early-stage to advanced targets with significant drill hole gold intervals, with plans to test these targets with drilling and other exploration programs⁵.

Directors' Report

At the Company's 100%-owned Big Bang tenement in the Central Fraser Range region of Western Australia, a planned movingloop electromagnetic ("MLEM") survey targeting potential magmatic nickel-copper targets⁶ has been deferred to the first half of 2022. Exploration activities at the Jamieson Project in Victoria are on hold, while the Company focusses its resources on its Western Australian projects and Tropicana North in particular.

In addition to the programs completed and in-progress at its majority-owned projects, Carawine's farm-in and joint venture partners were also active during the period.

At the Fraser Range Joint Venture (IGO Ltd ("IGO"); 70% interest, earning up to 76% interest) in the Fraser Range region of Western Australia, IGO identified and drill-tested three conductive anomaly targets at Red Bull targeting magmatic nickel-copper sulphides, with graphitic metasediment determined as the source of the conductive anomalies7. IGO has additional air core drilling programs planned at the Bindii and Big Bullocks tenements during the first half of 2022.

At the West Paterson JV (Rio Tinto Exploration Pty Ltd ("Rio Tinto"); earn-in right to 80%) in the Paterson region of Western Australia, Rio Tinto completed RC drilling at the Ghost and Zulu prospects on the Red Dog tenement and generated six conductive anomalies from a helicopter-borne electromagnetic ("AEM") survey over the Baton tenements8. Assay results from the RC program are expected during March or April 2022. Drilling programs are planned to test two priority AEM targets and other prospects at Baton and Red Dog during 2022. At the Coolbro JV (Fortescue Metals Group Ltd ("Fortescue"); earn-in right up to 75%), also in the Paterson region, Fortescue continued its target generation activities, with drilling also planned in 2022.

At the Oakover JV (Black Canyon Ltd ("Black Canyon"); earn-in right up to 75%) in the East Pilbara region of Western Australia, manganese-focussed explorer Black Canyon reported an Inferred Mineral Resource estimate based on historic drill data totalling 15 million tonnes (Mt) @ 11.3% manganese (Mn) for the LR1 deposit9. Subsequent RC and diamond drilling by Black Canyon has identified significant thicknesses and grades of near-surface manganese mineralisation at the LR1 and FB3 prospects, with data from the program to be used to update the LR1 Mineral Resource and provide inputs for a scoping study at LR1 during the first half of 202210.

CORPORATE ACTIVITIES

Share Placement Completed

On 15 November 2021, the Company announced a placement to raise a total of \$4.94 million (before costs) through a twotranche placement of approximately 27.2 million ordinary shares ("Shares") at an issue price of 18 cents per Share ("the Placement"). The issue price represented an 8.9% discount on the 15-day volume weighted average price of the Company's traded shares prior to the announcement. The first tranche ("Tranche 1"), comprising the issue of 27 million Shares to raise \$4.9 million (before costs), was completed on 15 November 2021.

The second tranche ("Tranche 2"), comprising the issue of 222,224 Shares to raise \$40,000 (before costs), was completed on 23 December 2021, following approval at the Company's Annual General Meeting held on 22 December 2021, For further details refer to the Company's ASX announcements dated 15 November and 23 December 2021.

QGOLD TAKEOVER OFFER

Subsequent to the reporting period, as announced on 22 February 2022, the Company received an unsolicited, on-market takeover offer by OGold Pty Ltd (ACN 149 659 950) ("OGold") to acquire all fully paid ordinary shares on issue in Carawine which QGold (and/or QGold's associates) does not already own or control at 21 cents per share ("Offer").

On 8 March 2022, the Company released its Target's Statement in response to the Offer. The Board has carefully considered whether the Offer is in the best interests of shareholders, and unanimously recommend that shareholders reject the Offer. The reasons for the Directors' recommendation are detailed in the Target's Statement, which shareholders are urged to read in full before making a decision to accept or reject the Offer.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Preparation

These interim financial statements are general purpose financial statements prepared in accordance with the requirements of the Corporations Act 2001, applicable accounting standards including AASB 134 Interim Financial Reporting, Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board ('AASB'). Compliance with AASB 134 ensures compliance with IAS 34 Interim Financial Reporting.

This condensed consolidated interim report does not include full disclosures of the type normally included in an annual financial report. Therefore, it cannot be expected to provide as full an understanding of the financial performance, financial position and cash flows of the Group as in the full financial report.

It is recommended that this financial report be read in conjunction with the annual financial report for the year ended 30 June 2021 and any public announcements made by the Group during the half year in accordance with continuous disclosure requirements arising under the Corporations Act 2001 and the ASX Listing Rules.

The interim report has been prepared on a historical cost basis. Cost is based on the fair value of the consideration given in exchange for assets. The Group is a for profit entity domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

For the purpose of preparing the interim report, the half-year has been treated as a discrete reporting period.

(b) Statement of Compliance

The interim financial statements were authorised for issue on 14 March 2022.

The interim financial statements comply with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards (AIFRS). Compliance with AIFRS ensures that the financial report, comprising the interim financial statements and notes thereto, complies with International Financial Reporting Standards (IFRS).

(c) Accounting policies and methods of computation

The Group's accounting policies and methods of computation adopted are consistent with those of the previous financial year and corresponding half-year except for the impact of the new and revised standards effective 1 July 2021 outlined in Note 1(d) below. These accounting policies are consistent with Australian Accounting Standards and with International Financial Reporting Standards.

(d) Adoption of new and revised standards

Standards and Interpretations applicable to 31 December 2021

In the period ended 31 December 2021, the Directors have reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to the Group and effective for the current reporting periods beginning on or after 1 July 2021. As a result of this review, the Directors have determined that there is no material impact of new Standards and Interpretations issued and, therefore, no change is necessary to the Group's accounting policies.

Standards and Interpretations in issue not yet adopted

The Directors have also reviewed all Standards and Interpretations in issue not yet adopted for the period ended 31 December 2021. As a result of this review the Directors have determined that there is no material impact of the Standards and Interpretations in issue not yet adopted on the Group and, therefore, no change is necessary to the Group's accounting policies.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Significant accounting judgements and key estimates

The preparation of interim financial reports requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim report, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial report for the year ended 30 June 2021.

(f) Going concern

The interim financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and settlements of liabilities in the ordinary course of business.

NOTE 7: SHARE-BASED PAYMENT PLANS

Options

The following ESOP Options pursuant to the Group's ESOP were issued during the period:

	Number	Grant date	Expiry date	Exercise price	Fair value at grant date
SERIES 7	3,000,000	23/12/2021	23/12/2025	\$0.40	\$255,930
SERIES 8	2,250,000	23/12/2021	23/12/2025	\$0.60	\$162,286

The fair value of the equity-settled share options granted under the Group's ESOP is estimated as at the date of grant using the Black-Scholes model taking into account the terms and conditions upon which the options were granted; and the following inputs:

	SERIES 7	SERIES 8
Dividend yield (%)	-	-
Expected volatility (%)	0.94	0.94
Risk-free interest rate (%)	0.94	0.94
Expected life of option (years)	4	4
Exercise price (cents)	40	60
Grant date share price (cents)	10	10

The incentive options are not subject to vesting conditions, and have been recognised as an accounting expense immediately.

The expected life of the options is based on historical data and is not necessarily indicative of exercise patterns that may occur. The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may also not necessarily be the actual outcome. No other features of options granted were incorporated into the measurement of fair value.

NOTE 7: SHARE-BASED PAYMENT PLANS (continued)

The following performance rights were in place in the current period and were subject to the Group's Performance Rights plan:

On 31 January 2022, the Group Issued 1,500,000 fully paid ordinary shares at \$0.20 each to Rio Tinto Exploration Pty Ltd, raising \$300,000 (before costs), in accordance with the terms of the West Paterson Farm-in and Joint Venture Agreement.

Subsequent to the reporting period, as announced on 22 February 2022, the Company received an unsolicited, on-market takeover offer by QGold Pty Ltd (ACN 149 659 950) ("QGold") to acquire all fully paid ordinary shares on issue in Carawine which QGold (and/or QGold's associates) does not already own or control at 21 cents per share ("Offer").

On 8 March 2022, the Company released its Target's Statement in response to the Offer. The Board has carefully considered whether the Offer is in the best interests of shareholders, and unanimously recommend that shareholders reject the Offer. The reasons for the Directors' recommendation are detailed in the Target's Statement, which shareholders are urged to read in full before making a decision to accept or reject the Offer.

No other matters or circumstances have arisen since the end of the half-year which have significantly affected or may significantly affect the operations or the state of affairs of the Group in the future financial years.

During the period, the Group operated predominantly in one segment being the minerals exploration sector in Australia. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit.
